We at Blue Water Designs appreciate this opportunity to introduce our unique line of products for the Sport and Commercial Fishing Communities. We are delighted to bring you some of the most useful, innovative and versatile items to enhance and improve your fishing experience.

*“The Fly Rod you save, may be your own”*

If you have any questions regarding our products or would like to place an order, please contact the *Blue Water Design Guys* Tom Delekta & Mike Stange at 1-800-471-FISH (3474).

### “DelStang” Fly Rod Holder / Transporter

The “DelStang” Fly Rod Holder / Transporter is designed to protect your rigged fly rod and reel investment. Our design simplicity, using one of our various attachment devices, lends itself to easy mounting on your boat, car, truck, float, personal watercraft or even your bicycle!

Item	Description	Min Sugg Retail Price
1FRHT	“DelStang” Fly Rod Holder / Transporter .....	\$24.99
1FRHT-SS	2” dia. Stainless Steel “DelStang” .....	\$69.99

4RRH	4-Rod Combo .....	\$129.99
FRHT-KIT	“DelStang” Refurbish Kit for Stainless & Original.....	\$4.99

Our system of racked fly rod holders is ready for roof or center console mounting. Single or multiple fly rod holders are available in Natural Teak or Starboard. Additional rod holders in vertical or horizontal positions are available.

The vertical mounting of single fly rods can be spaced at various positions on any boat, keeping fly rods ready for instant action. Stainless steel brackets with Teak rails adapt the “DelStang” Fly Rod Holder to popular European after-market roof racks or 7/8” boat rails.

You will gain twice the functionality in the same space with our new “T-Mount”. In addition, you gain added security for your investment by rotating your fly rod and reel 90 degrees out of the flow of traffic.

“DelStang” Fly Rod Holder / Transporter

When mounting multiple single Fly Rods you can space them to fit your needs

the “T-Mount”

### Stainless Steel Fly Rod Riggers

An exciting addition to the “DelStang” Fly Rod Holder / Transporter line-up is the “Fly Rod Rigger”. Designed to fit into existing conventional Gunwale Rod Holders. The Fly Rod Rigger holds your fly rod in a removable gimbal mount, much like an outrigger, allowing the Fly Rod Rigger placement on any Flush Mount Rod Holder. Now you can set your teaser baits in the water while keeping your fly in front of the fish, **HANDS FREE!**

150° Fly Rod Rigger

### Blue Water Designs Gunwale Clamp Adaptor Kit

The Blue Water Designs Gunwale Clamp can be mounted almost anywhere! Equipped with a 2" mounting clamp, it can be mounted to the Gunwale for trolling or for fly rod storage. The clamp can swivel 360 degrees and can be tilted at 0, 30, 60 or 90 degrees. This versatility allows you to troll at various angles or to just simply store your fly rods.

1GUN-B	Gunwale Bracket Only .....	\$22.99

### Blue Water Designs Deboner

The Blue Water Designs Deboner has a very sharp machined “V” notch, which is the key feature of this essential fishing tool. This machined cutting edge allows for the quick and clean preparation of your Trolling tackle setups. The Blue Water Designs Deboner comes in two sizes (1/2" and 5/8" diameter). Each Deboner comes with a matched size clean out rod, rubber handles, and a cutting edge protector.

### Blue Water Designs Stretcher and Tarpon Stretcher

The Blue Water Designs Stretcher and Tarpon Stretcher was designed for the needs of all anglers in the pursuit of toothy fish. Both allow you to safely and easily transport 22 Flies, pre-rigged, with either wire or mono tippets to your favorite fishing destinations.

Both styles are durable, made of tough construction, completely corrosion resistant. Nothing to rot, tear or break! The shock cords can be adjusted to accommodate shock tippet lengths from 2" to 4" on the Blue Water Stretcher and up to 12" in length on the Blue Water Tarpon Stretcher! When correctly assembled and loaded, hook points are hidden safely inside the Stretcher frame; keeping them away from you, your waders and clothing. The fly hooks points also snap in to protect pre-sharpened hooks against dull points.

# Wire Shock Tippets

## For All Fresh and Salt Water Sharp Toothed Species

Fly fishing for toothy critters has always been a problem. Blue Water Designs "*Wire Shock Tippets*" are the answer. Seven different styles will help keep your fly rod doubled over while fighting anything from Northern Pike to Mako Sharks.

Our *Adjustable Wire Shock Tippets* were created for heavy duty blue water use on fish over 10 pounds. The special feature of the 14", 88 pound test wire tippet, with a double looped eye, is an increased sink rate especially effective with Shark Fly Patterns. The option to customize the length on this series of wire tippets also allow current IGFA Wire Shock Tippet Standards to be met.

*Removable Wire Shock Tippets* incorporate a specially designed Snap to facilitate quick fly changes without the hassle of a Haywire Twist on a new fly and wire tippet. The removable wire tippets are available in 3.75", 4.0" and 10.5" lengths.

Blue Water Designs 4" and 10.5" *Wire Tippets with Fly Snap and Swivel* help prevent leader twist with Poppers, Sliders, or any large wind resistant flies.

The *Fly Snap* is also available separately for the Angler who wishes to save on expensive Fluorocarbon Tippets. At the same time the Fly Snap provides a free swinging loop, making flies move more enticingly throughout the entire strike zone.

# Stainless Steel Rod Holders

The *Adjustable Torque Swivel Base Rod Holder* is designed for heavy duty bent butt tackle. The swivel base allows your rod to turn in the direction the fish is swimming; especially important when you have your reel set with a heavy drag. Two new *Sidemount Rod Holders* are now available. Our 10" model is designed to ensure the safe, but quickly available, storage of your pre-rigged rod. The 12" model has a bonus feature of being able to setup for Trolling. The newest addition to our product line is the *Gunwale Rod Holder*. Available in three different degree models and have the same heavy duty polished flange found in our swivel base models. The *DelStang Conventional Rod Holder Rigger* designed to extend your rod over the side of your boat for Trolling, bottom fishing and electric reel deep bottom fishing!
